Activity Diagram #1

Created by: Jeremy

Reviewed by: Zachary

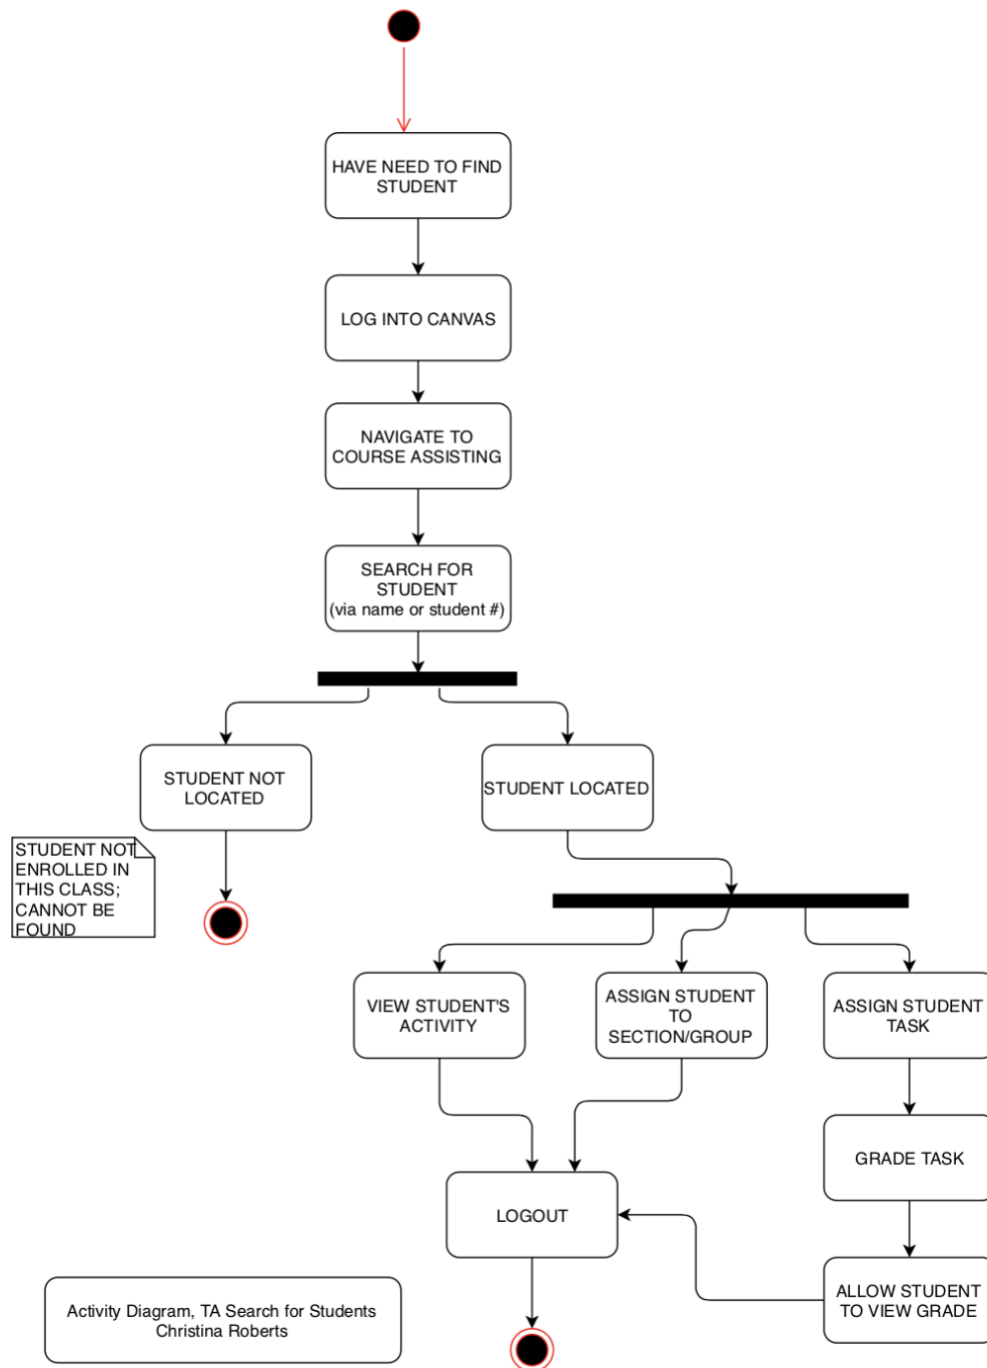

This diagram is for the student to resubmit an assignment. The activity checks that the student is enrolled in the course, that the assignment is still open, and that there is a valid file type.

Activity Diagram for an Instructor to add/remove TAs from course sections

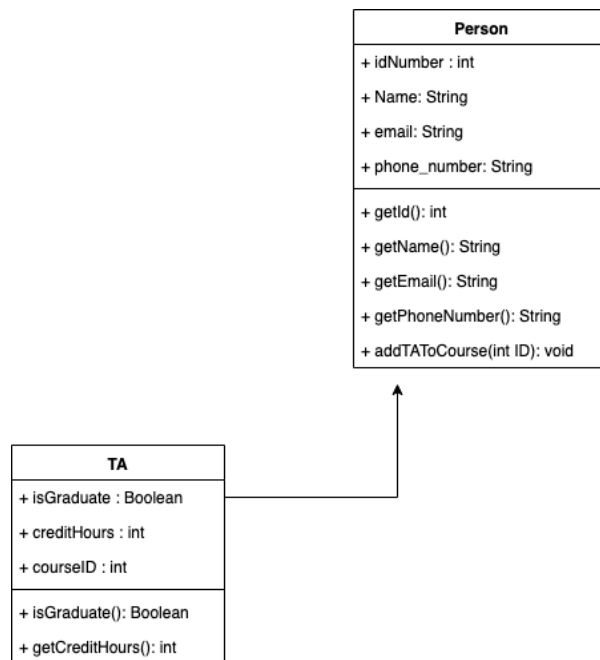

For this particular activity, when the instructor opens the course, they have the option to add a TA or remove a TA.

Class Diagram

Created by: Jeremy

Reviewed by: Christina

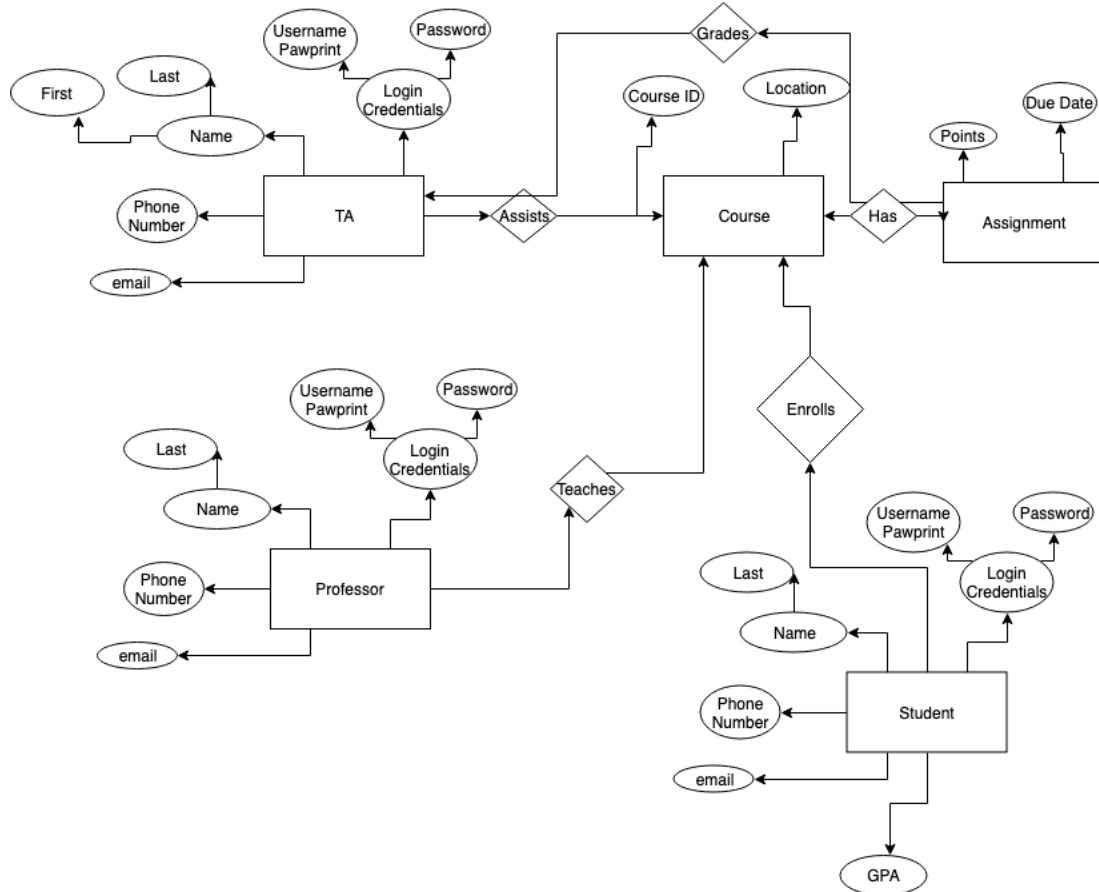

The class diagram is of a TA. The TA is a child class of a person.

Entity Relationship Diagram

State Machine Diagram for Login/Logout

This diagram shows that you start **logged out**. When you submit information to login, it will load.

If the information you entered fails, you will go back to being logged out. If the information succeeds, you will be **logged in**.

While you're logged in, you can log out to go back to the logged out state.
